

Medications

The Medications area of the Patient Portal provides the Portal User with a way to view their active home medications and access information about the medication they are taking. Medications may be accessed directly from the “Medications” button on the Homepage or from within the “Health Record” button.

The screenshot displays the Patient Portal homepage with five main navigation buttons: Health Record, Medications, Appointments, Billing, and Profile. The Medications button is highlighted with a red border. Below the navigation buttons are three sections: Announcements, COVID-19, and Helpful Resources. The Announcements section contains a message about surgery. The COVID-19 section contains a link to the COVID-19 Certificate. The Helpful Resources section contains links to LSH Patient Forms, LSH Webpage, LSH Patient Portal HELP, and COVID-19 Information. At the bottom, there are links for Contact Technical Support, Preferences, and Terms & Conditions, along with a license notice for Medical Information Technology, Inc.

Medications Main Page

By selecting the Medications button from the homepage, the Portal User is presented with a list of the patient's home medications since last visit to Lincoln Surgical Hospital or Nebraska Surgery Center.

Select a medication to view details. Special instructions are entered in the comments sections of our Electronic Health Record. They may not be viewable on the portal.

Your Medications will be confirmed/updated on the day of your surgery. Edits can only be made by the nurse. [Learn More](#)

IMPORTANT: HOW TO USE THIS INFORMATION: This is a summary and does NOT have all possible information about this product. This information does not assure that this product is safe, effective, or appropriate for you. This information is not individual medical advice and does not substitute for the advice of your health care professional. Always ask your health care professional for complete information about this product and your specific health needs.

CEPHALEXIN - ORAL (sef-a-LEX-in)

COMMON BRAND NAME(S): Keflex

USES: This medication is used to treat a wide variety of bacterial infections. This medication is known as a cephalosporin antibiotic. It works by stopping the growth of bacteria.
This medication will not work for viral infections (such as common cold, flu). Unnecessary use or misuse of any antibiotic can lead to its decreased effectiveness.

OTHER USES: This section contains uses of this drug that are not listed in the approved professional labeling for the drug but that may be prescribed by your health care professional. Use this drug for a condition that is listed in this section only if it has been so prescribed by your health care professional.
This drug may also be used before dental procedures in people with certain heart conditions (such as artificial heart valves) to reduce the risk of a serious infection of the heart (bacterial endocarditis).

HOW TO USE: Take this medication by mouth as directed by your doctor, usually every 6 to 12 hours with or without food.
If you are using the suspension, shake the bottle well before each dose. Measure the dose carefully using a special measuring device/spoon. Do not use a household spoon because you may not get the correct dose.
The dosage is based on your medical condition and response to treatment. In children, the dose is also based on weight.
For the best effect, take this antibiotic at evenly spaced times. To help you remember, take this
